WEATHERPROOF COVERS

Technical Information

This product is intended for applications that require wet location protection for electrical devices while the device is in use.

This Cover can be mounted to an FS type box intended for wet locations, or a smooth, flat mounting surface. Installation of wiring device and this Cover by an electrical contractor or individual who has a basic understanding of electrical wiring is also recommended. The Cover must be installed in accordance with the National Electrical Code (NEC) and local codes.

The Cover complies with NEC Article 410-57 for outdoors, and complies with NEC Article 410-57 (B), and subrule 26-706 of the Canadian Electrical Code.

Wet Locations - A receptacle installed outdoors where exposed to weather or in other wet locations shall be in a weatherproof enclosure, the integrity of which is not affected when the receptacle is in use (attachment plug cap inserted).
