

Plenum-Gard – Frequently Asked Questions

What fittings can be used with your Plenum-Gard?

For 1" Plenum-Gard, you can use the 1" Plenum-Gard fittings such as the A340F Quick Connect Coupling, A343F Quick-Connect Threaded Adapter, or the A353F Quick-Connect Snap-In Adapter. For other Plenum-Gard sizes, you can use the E147 series metallic terminal adapters or the E142 series threaded aluminum couplings.

Can you tell me if you have a tee fitting that will attach to the plenum guard and riser guard non-metallic raceways? If so can you send me the part number information? Also, can I specify these products to be purple in color? If not purple, are there other colors available?

Plenum-Gard and Riser-Gard is only available in orange or white. The only raceways that we carry, you can specify in purple (lilac), is our polyethylene raceways (Optic-Gard PE) for outdoors.

As for the tee fittings, we have a type T conduit body that can be used with the riser-gard, but not the plenum-gard. We do not have any type of fitting like that for plenum-gard.

Within a plenum environment, do I still need to install a plenum rated Cat 5E cable within a plenum rated innerduct?

Yes, the cable must be plenum rated

Can you use Plenum-Gard in a cable tray?

Yes, you can put raceways in cable trays; however, you still have to abide by the supporting requirements
