

To Whom It May Concern:

You have requested a Material Safety Data Sheet for either our outlet boxes, enclosures, conduit, pipe or fittings, etc. Please be advised that an MSDS is not provided because that product is an "article" under the OSHA Hazard Communication Standard (HSC), 29 CFR 1910.1200.

The Hazard Communication Standard has an exemption for articles. To fall under the article exemption, the product must be a manufactured item: (1) which is formed to a specific shape or design during manufacture; (2) which has end-use functions dependent in whole or in part on its shape or design; and (3) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use. The PVC outlet boxes, conduit, pipe and fittings produced by Lamson and Sessions meet all of these criteria and, consequently, are exempt from the Hazard Communication Standard.

If you have any further questions, please contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "D. Kendall".
